Summary

Full-Stack Developer experienced in building high-performance web applications from frontend to backend. Strong in React, Next.js, Node.js, databases, and cloud deployments, with hands-on experience solving real-world scalability and concurrency problems.

Education

Bennett university, Greater Noida

(Bachelor of technology in Computer Science Engineering)

(2023- 2027)

- CGPA - 8.01

Technical Skills

- **Languages:** JavaScript (JS), TypeScript (TS), C++ (DSA)
- **Frontend Libraries / Frameworks:** React.js, Next.js, ShadCN , TanStack Query, Zustand, Framer Motion, GSAP.
- **Backend Frameworks / Tools:** Node.js, Express.js, REST APIs , WebSockets , tRPC, Inngest, Appwrite, Clerk, Better Auth, NEXT Auth.js
- **Databases:** MongoDB, SQL, PostgreSQL, Redis
- **Cloud & Media Tools:** ImageKit, Stream SDK
- **Version Control & Collaboration:** GitHub
- **Deployment & DevOps:** Docker, Vercel, Render, GitHub

Projects

Airplane Backend & Flight Service System

([Backend – Microservices](#) | [Node.js](#) | [Express.js](#) | [MySQL](#) | [MVC](#))

- Built 2 independent microservices (Flight + Booking) handling concurrent seat reservations across 100+ simulated requests/sec.
- Implemented idempotency & race-condition handling, reducing duplicate bookings to near 0% in stress tests
- Designed **scalable service architecture** with clean separation of concerns and structured inter-service communication improving **request handling efficiency** by 30%.
- Designed transactional workflows ensuring **100% data consistency** for seat allocation and booking operations
- Ensured **data consistency** and **transactional safety** for seat management and booking workflows in real-world scenarios.

[Github](#)

Snapgram

([Full Stack](#) | [React](#) | [TypeScript](#) | [Appwrite](#) | [Tailwind CSS](#) | [TanStack Query](#))

- Developed a full-stack social platform supporting **real-time feed rendering for 500+ posts/session** .
- Optimized data fetching with TanStack Query, reducing **load time by 40%** .
- Built infinite scrolling improving **user session engagement (smooth UX across long feeds)** .
- Designed mobile-first UI achieving **<1.5s initial load on average devices** .
- Implemented secure authentication and role-based access for **multi-user interactions** .
- Developed features including **Explore page, Saved posts, User profiles**, and **Drag-and-drop media uploads**.
- Integrated **role-based access and secure authentication using Appwrite**, with robust form handling and validation via ShadCN Forms and Zod.

[Demo](#)

CreateKit – AI SaaS Platform

([Full Stack](#) | [React 19](#) | [Node.js](#) | [Express 5](#) | [Gemini](#) | [TypeScript](#) | [PostgreSQL](#) | [Clerk](#) | [Cloudinary](#))

- Built AI SaaS platform supporting **multiple content generation workflows (text, images, resume analysis)** .
- Integrated **Gemini API via OpenAI** and **Krea API** for article generation, AI image creation, background/object removal, and resume analysis.
- Built secure REST APIs with Clerk authentication, structured creation management, and publish/share capabilities.
- Implemented in-memory file handling, parsing pipeline processing **PDFs up to 5MB efficiently** and cloud media storage using **Multer + Cloudinary**, following serverless architecture best practices.

Work Experience

Diggitronic - [Freelance Contract](#) (Jan 2026 – April 2026)

- Developed and deployed a high-performance 3D agency website using React, Three.js, Framer Motion, and modern frontend technologies, showcasing AI, design, and marketing services through immersive interactive experiences.
- Engineered advanced animations, scroll-based interactions, and performance optimizations while maintaining responsive design, accessibility, and SEO best practices for a production client website.

[LIVE](#)

STRIFT (Frontend Developer) - [Freelance Contract](#) (June 2024 – Jan 2025)

- Built and deployed a modern social-commerce platform using React, Tailwind CSS, and Framer Motion, developing 10+ reusable UI components and responsive mobile-first interfaces.
- Designed scalable frontend architecture and optimized rendering performance, delivering smooth animations and a consistent 60 FPS user experience.
